News Release

S. W. COLE Opens New Office in Keene, New Hampshire.

Keene, NH, July 18, 2008: S. W. Cole Engineering, Inc. has opened a Keene area office and laboratory at 140 Monadnock Highway in Swanzey, New Hampshire. The firm offers construction materials testing and geotechnical engineering from the new location. The address and telephone numbers:

140 Monadnock Highway, Unit 7
Swanzey, NH 03446
Telephone: (603) 283-1064
Facsimile: (603) 283-1065
E-mail: infokeene@swcole.com

<http://www.swcole.com>

The office will be managed by Andrew Michaud, who has worked for S. W. Cole since 1999 as a senior materials technician on numerous projects in New England. This new location allows S. W. Cole to more effectively service existing clients in the Monadnock Region and pursue additional opportunities for projects in western New Hampshire and Massachusetts and southern Vermont. The new office is more conveniently located to some of the projects S. W. Cole is working on in the area, including the new Cheshire County Jail and the new wind farm project at Lempster Mountain. S. W. Cole's laboratory provides physical testing of concrete, soil, aggregates and asphalt. S. W. Cole technicians provide field testing of construction materials for projects that include buildings, roads and bridges, infrastructure such as water and sewer projects, and industrial projects including wind mills, manufacturing plants and power projects.

For Immediate Release

more
