Paul Kohler, P.E., Vice President, noted "We have worked on projects in Portland over the last 29 years and have established many great relationships. This new downtown office location is conveniently located close to many of our clients and their projects." The firm provides geotechnical engineering, geology, hydrogeology, environmental consulting and ecological services from the new location. "The new office will be staffed by Steve Pinette, C.G., Senior Geologist, and Tim Boyce, Senior Geotechnical Engineer." said Kohler. The firm will continue to provide construction materials testing, as well as all of the other services the firm offers in the southern Maine area, from its office and laboratory in Gray, Maine.

S. W. Cole Engineering, Inc. was founded in 1979 and provides geotechnical engineering, construction materials testing, environmental consulting, wetlands and soil science, and geology/hydrogeology services. S. W. Cole Engineering, Inc. also has offices in Augusta, Bangor, Caribou, and Gray, Maine, and in Keene and Somersworth, NH and works on projects throughout New England. The company has about 90 employees.
